Remote Sensing of Environment

Title Index–Volume 2

Airborne laser and stereogrammetric sea ice profiles, statistical comparison of, 261

Aircraft, and satellite infrared (10 μm–12 μm) remote measurements of surface temperature, direct comparison of, 243

Aircraft, ship and satellite, observation of the Gulf Stream surface front by, 109

Arctic pack ice, airborne laser profiling of, 41

Arctic Sea ice, aircraft measurements of microwave emission from, 129

Atmospheric echo-sounders, comparison of sensitivities of, 223

Atmospheric temperature profiles, optimization of spectral intervals for remote sensing of, 193

Atmospheric water vapor, measurement by Raman lidar, 101

Atmospheric water vapor, radio-optical dispersometer for studies of, 37

Azimuthal variations in directional reflectance of vegetative canopies, cause of, 175

Blight detection, corn, verification of a reflectance model for mature corn, 183

Book Review: R. K. Holz, Ed., *The Surveillance Science: Remote Sensing of Environment* (*reviewed by* G. J. Zissis), 285

Comment on "Estimation of Sea Surface Temperature from Space", 165

Comment by G. A. Maul and M. Sidran, reply to, 171

Corn leaves, reflectance studies of healthy, miaze dwarf mosaic virus-infected, and *Helminthosporium maydis*-infected, 77

Corn, mature, verification of a reflectance model for, with applications to corn blight detection, 183

Crop discrimination with color infrared photography: A study in Douglas County, Kansas, 21

Crop surveys from multiband satellite photography using digital techniques, 53

Discrimination, crop, with color infrared photography: A study in Douglas County, Kansas, 21

Dispersometer, radio-optical, for studies of atmospheric water vapor, 37

Echo-sounders, atmospheric, comparison of sensitivities of, 223

Ecotone, Canadian forest-tundra, an effort to identify on weather satellite imagery, 9

Emission, microwave, aircraft measurements of from Arctic Sea ice, 129

(ERTS-1) data, Earth's Resources Satellite, analysis of, 273

ERTS-1, suspended sediment observations from, 205

Estuarine environment, remote measurement of salinity in, 249

Floodplain, Argentine alluvial, analysis of the surface morphology of using near-infrared photography, 235

Forest-tundra ecotone signature, Canadian, an effort to identify on weather satellite imagery, 9

Gamma-spectrometric surveys, low altitude, from helicopters in Puerto Rico as an example of remote sensing of thorium, uranium, and potassium in soils and rocks, 83

Gulf stream, observation of the surface front structure by ship, aircraft, and satellite, 109

Ice, arctic pack, airborne laser profiling of, 41

Ice, sea, statistical comparison of airborne laser and stereogrammetric profiles, 261

Infrared (10 μm–12 μm) remote measurements of surface temperature, by satellite and aircraft, direct comparison of, 243

Kansas, Douglas County, a study in, on crop discrimination with color infrared photography, 21

Laser, airborne, and stereogrammetric sea ice profiles, statistical comparison of, 261

Laser profiling, airborne, of the arctic pack ice, 41

Marine oil spills, multispectral concept as applied to, 141

Microwave emission, aircraft measurements of, from Arctic Sea ice, 129

Multiband satellite photography, crop surveys using digital techniques, 53

Multispectral concept as applied to marine oil spills, 141

Near-infrared photography, use of in the analysis of surface morphology of an Argentine alluvial floodplain, 235

Oceanographic applications of color-enhanced satellite imageries, 71
Oil spills, marine, multispectral concept as applied to, 141

Photography, color infrared, crop discrimination with: A study in Douglas County, Kansas, 21
Photography, multiband satellite, crop surveys using digital techniques, 53
Photography, near-infrared, use of in the analysis of surface morphology of an Argentine alluvial floodplain, 235
Photometric properties of selected rocks, by spectral reflectance, 95
Potassium, thorium and uranium, low altitude gamma-spectrometric surveys from helicopters in Puerto Rico as an example of remote sensing, 83

Radio-optical dispersometer for studies of atmospheric water vapor, 37
Raman lidar, atmospheric water vapor measurement by, 101
Reflectance, directional, of vegetative canopies, cause of azimuthal variations in, 175
Reflectance, directional, of a vegetative canopy, calculation of, 117
Reflectance model for mature corn with applications to corn blight detection, verification of a, 183
Remote sensing of atmospheric temperature profiles, optimization of spectral intervals for, 193
Remote sensing of thorium, uranium, and potassium in soils and rocks, an example of, using low altitude gamma-spectrometric surveys from helicopters in Puerto Rico, 83
Reply to the Comment by G. A. Maul and M. Sidran, 171
Rocks, and soils, low altitude gamma-spectrometric surveys from helicopters in Puerto Rico as an example of remote sensing, 83
Rocks, spectral reflectance and photometric properties of, 95

Salinity, remote measurement of in an estuarine environment, 249
Satellite, aircraft and ship, observation of the Gulf Stream surface front by, 109
Satellite and aircraft infrared (10 μm–12 μm) remote measurements of surface temperature, direct comparison of, 243
Satellite, Earth's Resources (ERTS-1) data, analysis of, 273
Satellite imageries, oceanographic applications of color enhanced, 71
Satellite photography, multiband, crop surveys using digital techniques, 53
Satellite, weather, imagery, an effort to identify the Canadian forest-tundra ecotone signature on, 9
Sea ice profiles, statistical comparison of airborne laser and stereogrammetric, 261
"Sea Surface Temperature from Space, Estimation of," comment on, 165
Sediment, suspended, observations from ERTS-1, 205
Ship, aircraft, and satellite, observation of the Gulf Stream surface front by, 109
Soils and rocks, remote sensing of thorium, uranium, and potassium in, using low altitude gamma-spectrometric surveys from helicopters in Puerto Rico, 83
Solar radiation, reflected, airborne measurements of, 1
Spectral reflectance and photometric properties of selected rocks, 95
Surface morphology of an Argentine alluvial floodplain, use of near-infrared photography in the analysis of, 235
Surveys, crop, from multiband satellite photography using digital techniques, 53

Temperature profiles, atmospheric, optimization of spectral intervals for remote sensing of, 193
Thorium, uranium, and potassium in soils and rocks, remote sensing of, using gamma-spectrometric surveys from helicopters in Puerto Rico, 83

Uranium, thorium and potassium, in soils and rocks, low altitude gamma-spectrometric surveys from helicopters in Puerto Rico as an example of remote sensing, 83

Vegetative canopies, cause of azimuthal variations in directional reflectance of, 175
Vegetative canopy, calculation of the directional reflectance of, 117

Water vapor, atmospheric, measurement by Raman lidar, 101
Water vapor, atmospheric, radio-optical dispersometer for studies of, 37
Weather satellite imagery, an effort to identify the Canadian forest-tundra ecotone signature on, 9
